TREATMENT

FACE

Imperium MED 400 is used in the aesthetic field to treat numerous imperfections like:

- Face Wrinkles
- Loss of global volume
- Lack of glow
- Laxity of the face
- Acne

Treating the skin with diathermy, generates a localized increase of the temperature to boost the fibroblasts to create more collagen, elastin and hyaluronic acid.

Thanks to a combined therapy during the same session where you clean, repair and nourish the skin, it allows you non invasive "lifting" effects with a natural look.

## How RF Sculpturing by **IMPERIUM®** can improve the quality of your skin?

As we age, the skin loses volume and elasticity and hydration and the vascular tissue also decreases.

As a result, the skin becomes thinner, softer, stressed and dehydrated.

Endogenous heat produced by **IMPERIUM®** stimulation, over 2-4 months, causes the formation and growth of new collagen, with

an improvement of the quality of the skin.

After a session of Imperium, the skin will glow, the fine lines and wrinkles reduced and the jawlines more tightened.

Other effects:

- Eyebrow lifting (treatment of forehead, more lively, less stressed appearance)
- Lifted cheekbones
- Reduction in nasolabial folds.

Configuration can change. Ask your dealer for optional probes and accessories not visible in this page.
